Science Labs

Mohr Elementary
Mon K-2nd: 3 to 4pm
Tues 2nd - 5th: 3 to 4pm

We are offering eight new labs and a shark dissection. National and State standards encourage hands on experiments and testing. Spectrum of Science Foundation encourages the children to ask questions, make a hypothesis, experiment, test and draw conclusions. These are fun, active labs!! Science is all around us!

LET THE LEARNING CONTINUE!!

SIMPLE MACHINES MAKE THE WORLD GO ROUND! Are simple machines an actual invention or simply something learned from exploring & testing the world around us? Each week find fun in physics using crazy & cool pieces plus hammers & nails! Join in a siege of the castle! Build a mini-catapult and fire away! This is junkyard design at its best! Can you build a new invention out of an old one?

CHEMISTRY CONCEPTS: Are you a skeptical chemist? Let's clarify chemistry with ALL NEW happening experiment! Solutions, chemical properties, chemical reactions, states of matter a new way & molecules galore! Create an gooey solid! Join the ultimate bubble fest!

MARINE SCIENCE MANIA: Enter the world where little sunlight penetrates! Will your submarine submerge? Where are the whales? Survey symbiotic relationships of the deep! Why are these sea inhabitants hiding in the fort of a sponge? Research a fish cleaning station - find who is using it!

DYNAMIC DRAGONS AND DINOSAURS: Become a paleobiologist! Probe the prehistoric world of dinosaurs & see what remains today! Examine dinosaur remnants of the past then delve into modern dragons! They do exist! Puzzle the periods of the Mesozoic Era!! Science has never been so much fun!

GEOLOGY: MORE THAN MUD & STONES! Rock with geology adventures & shake with a quake! Scratch the surface of our planet & investigate what is happening under the earth's crust! Using your own volcano investigate lahars & laminar flow! Check out liquefaction. Explore the magnetic flip!

SPACE: THE UNREACHABLE FRONTIER: This is the YEAR OF THE SOLAR SYSTEM! Join our inner planetary research seeking encounters in space and check out fly by candidates in the Kuiper Belt! Where did Pluto go? There are New Horizons to cover! What is planet "X"? NASA & Space Science unlock doors to the future!

SINGULAR SCIENCE – TECHNOLOGY OF THE FUTURE! There is a whole new world of technology out there! Discover how it works! Shimmer & shine with fiber optics! Erect a loopy structure! There is much more science in your crystal ball!

THERE IS AN IDENTITY CRISIS SCIENCE! Calling all science sleuths! Investigate the extraordinary! This is **not** what you think! "May" may not be "may"! Who or what is a mean lean fighting machine? This is the epicenter of science! (Tuesday Only)

SHARK INVESTIGATION: Children requested that we repeat this lab! In these two weeks they will begin to understand that sharks may be at the top of their food chain & thus they are a significant indicator species of marine ecosystems as a whole. They will study the basic internal structures of a shark as well as observe its specialized features. How do the lateral line, the Ampullae of Lorenzini & the nictitating membrane assist the pelagic animal? This is a way to demonstrate conservation & preservation of the natural world!
